## DETAILED ACTION

### *Election/Restrictions*

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - I. Claims 1-10, drawn to a heat stabilizer, classified in class 252, subclass 301+.
  - II. Claims 11-16, drawn to a polyolefin composition, classified in class 524, subclass 89+.
  - IV. Claims 17-18, drawn to a dry-blended melt phase compounded polyolefin article, classified in class 524, subclass 89+.
  - V. Claims 19-23, drawn to a method for increasing the long term heat aging stability of a polyolefin, classified in class 524, subclass 89+.
  - IV. Claims 24-28, drawn to a method of increasing the long term heat aging stability for a polyolefin classified in class 524, subclass 89+.
  - VI. Claims 29-30, drawn to a materbatch composition, classified in class 524, subclass 89+

The inventions are distinct, each from the other because of the following reasons:

2. Inventions I and II, III or IV are related as mutually exclusive species in an intermediate-final product relationship. Distinctness is proven for claims in this relationship if the intermediate product is useful to make other than the final product (MPEP § 806.04(b), 3rd paragraph), and the species are patentably distinct (MPEP § 806.04(h)). In the instant case, the intermediate product is deemed to be useful as a stabilizer for polyester compositions and the inventions are deemed patentably distinct since there is nothing on this record to show them to be

Art Unit: 1714

obvious variants. Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions anticipated by the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

3. Inventions I and IV or V are related as product and process of use. The inventions can be shown to be distinct if either or both of the following can be shown: (1) the process for using the product as claimed can be practiced with another materially different product or (2) the product as claimed can be used in a materially different process of using that product (MPEP § 806.05(h)). In the instant case ) the product as claimed can be used in a materially different process of using that product such as to stabilize polyesters.

4. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

5. Claim 1 is generic to a plurality of disclosed patentably distinct species comprising components (A) through (D). Applicant is required under 35 U.S.C. 121 to elect a single disclosed species, even though this requirement is traversed. Applicant should elect an ultimate species for each of components (A) through (D).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the

Art Unit: 1714

examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

6. A telephone call was not made to request an oral election to the above restriction requirement, due to the complexity of the art involved.

7. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Kriellion A. Sanders whose telephone number is 703-308-2435. The examiner can normally be reached on Monday through Thursday 6:30-7:00.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Vasu Jagannathan can be reached on 703-306-2777.
